

JSP Custom Tags Quiz

1. Rewrite the JSP page in the first demo (forEach) to use scripting instead of the JSTL forEach.
2. How do custom tags relate to JSTL?
3. What is the role of the URI in the TLD and the taglib directive?
4. What is a tag handler class?
5. What is the role of attribute setters in a tag handler class?
6. What is the role of the doTag() method in a tag handler class?
7. What does the operation `getJspContext().getOut().write("Hi Bob")` do when called in a `doTag()` method?
8. What does the operation `getJspBody().invoke(null)` do when called in a `doTag()` method?
