HIGH LEVEL VIEW CONTEXT DIAGRAM

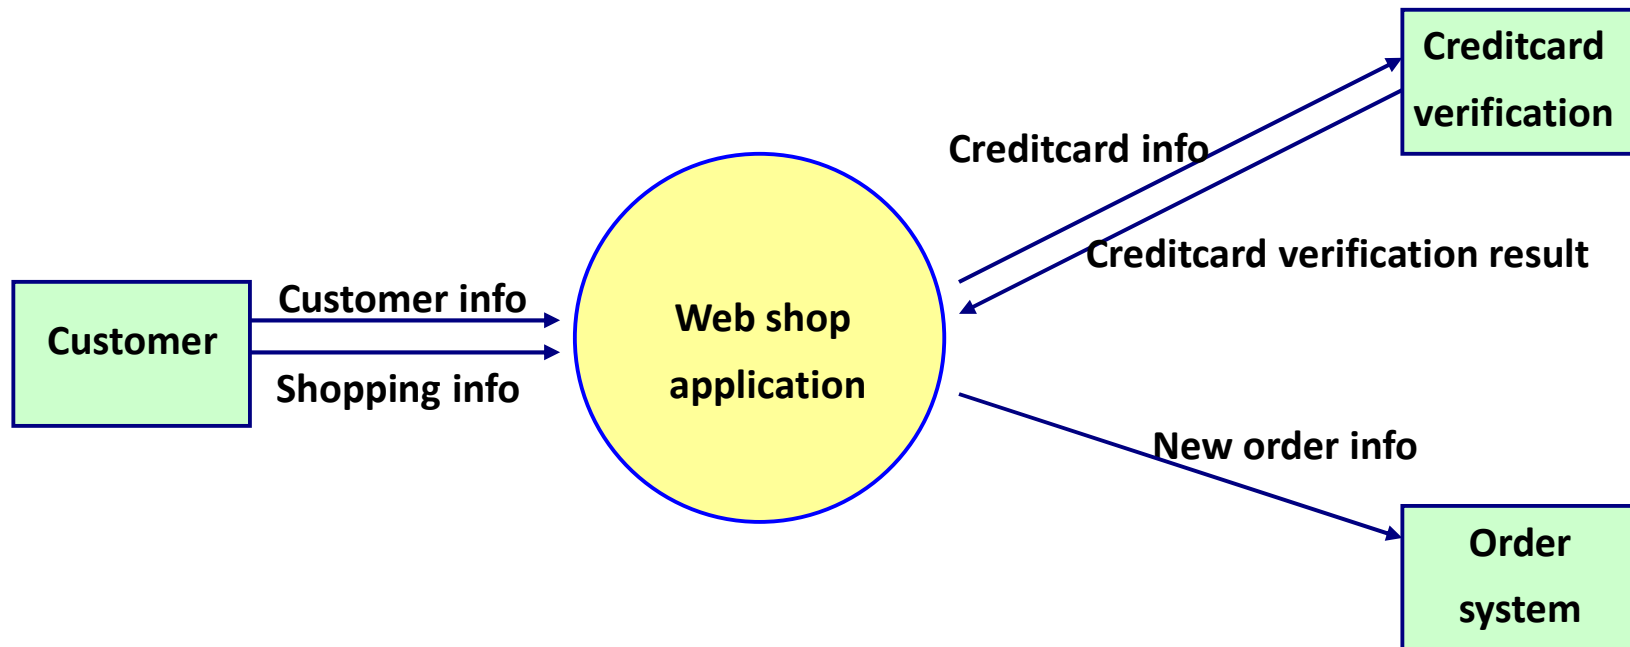

Agile requirements

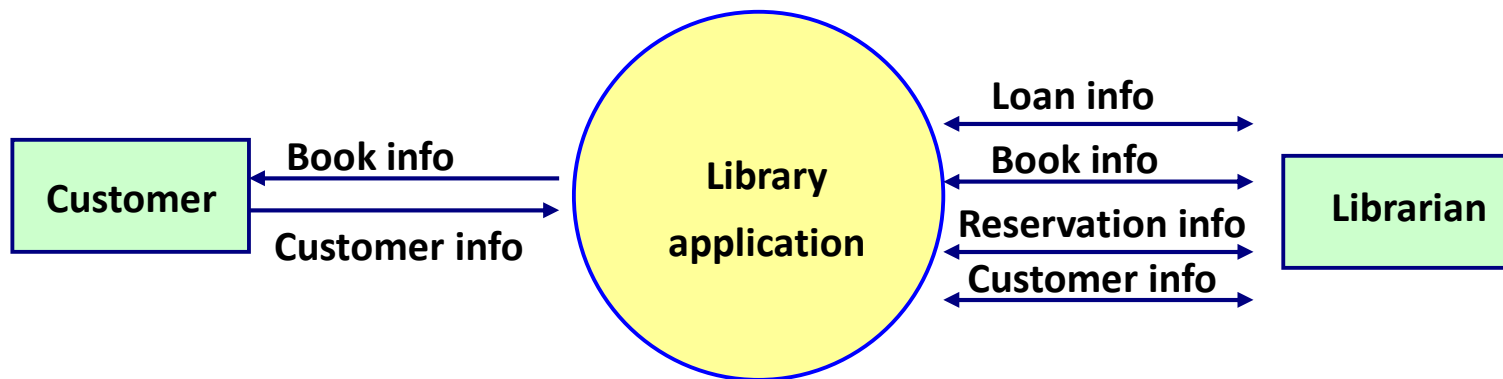

Context diagram

Webshop application

Library system

Context diagram best practices

- No connections between external entities
- The system is a black box
- The context diagram helps you in communicating the understanding of the system
- Do not draw all dialogs between the system and the external entities
 - Only show a high level view

General diagram best practices

- Know the purpose of the diagram before you start
- The diagram should fit on one page
 - And should still be readable
- Do not clutter the diagram with too much information
 - Remember what the purpose is
- What is allowed in the diagram?
 - Whatever fits the purpose
